Physics 8805: Learning from Data: Lecture 13

On board: Mini-project I due today (at least first pass).

Notebooks for today:

- dealing with outliers.ipynb

Plan: Go through "Dealing with outliers" notebook (see (74)).

- Note: version 3 of emcee was just pushed to github on September 30. This is a major update and I don't know yet the full impact.

• I do know that it removes the parallel tempering sampler, which I was going to use next! We may need to require version 2.2 for that exercise.
